About the Company

Crops Guard Radio Wave Technology offers a completely insecticide free solution to eliminate pest infestations of greenhouses.

Their patented hardware and software electronic system is based on proven Radio Frequency (RF). The technology is currently protecting advanced greenhouses and has effectively eliminated the need for insecticides in these greenhouses.

Crops Guard's versatile technology will work in virtually every greenhouse and can easily be integrated into your current greenhouse mainframe. Their system easily integrates into advanced robotics currently available in leading greenhouses and we are able to help find appropriate solutions for all greenhouse frameworks in all environments.
