

6-2018-5695 | Cannabinoids-Containing Beverages

[Touitou Elka](#), HUJI, School of Medicine - IMRIC, School of Pharmacy- Institute for Drug Research

Highlights:

CBD is a highly lipophilic molecule and therefore the preparation of cannabinoid-containing non- alcoholic beverages requires in general the use of various and important concentrations of additives.

We found a new technology permitting the addition of CBD to non-alcoholic beverages by using a very small amount of additive.

The technology is readily amenable to large scale production and can be easily incorporated into production lines of beverages manufacturers
